

ESLint error fix:-

****1. Navigate to your project folder****

```
```cmd
cd C:\Users\wwwva\Desktop\React-course\React-basics\practice\ecommerce
```
```

****2. Install eslint-plugin-react****

```
```cmd
npm install eslint-plugin-react --save-dev
```
```

****3. Open your eslint.config.js and manually add the changes****

```
```cmd
notepad eslint.config.js
```
```

Then make these edits in the file:

```
- Import the react plugin: `import react from 'eslint-plugin-react'`
- Add to plugins: `react: react`
- Add to rules:
  ```js
 'react/no-unknown-property': 'error',
 'react/react-in-jsx-scope': 'off',
 'react/jsx-uses-react': 'off',
  ```
```

****4. Verify everything works by running lint****

```
```cmd
npm run lint
```
```

****5. (Optional) Auto-fix whatever ESLint can fix on its own****

```
```cmd
npm run lint -- --fix
```
```

****Note on the `&&` error you saw**** – that was PowerShell rejecting `&&` as a command separator. PowerShell uses `;` instead. So if you ever want to chain commands in PowerShell:

```
```powershell
cd your\folder ; npm run lint
```
```

Or just switch to ****Command Prompt (cmd)**** where `&&` works normally.

```
import js from '@eslint/js'
import globals from 'globals'
import react from 'eslint-plugin-react'
```

```

import reactHooks from 'eslint-plugin-react-hooks'
import reactRefresh from 'eslint-plugin-react-refresh'
