

Routing in React:-

1) npm install react-router@7.8.0

2) import {BrowserRouter} from "react-router"

makes these changes inside main.jsx

```
import { StrictMode } from 'react'
import { createRoot } from 'react-dom/client'
import { BrowserRouter } from 'react-router'
import './index.css'
import App from './App.jsx'

createRoot(document.getElementById('root')).render(
  <StrictMode>
    <BrowserRouter>
      <App />
    </BrowserRouter>
  </StrictMode>,
)
```

3)

```
import HomePage from './Pages/HomePage'
import Checkout from './Pages/Checkout'
import Orders from './Pages/Orders'
import Tracking from './Pages/Tracking'
import {Routes,Route} from "react-router"
import './App.css'

function App() {
  return (
    <>
      <Routes>
        <Route path = "/" element = {<HomePage />} />
        <Route path = "/checkout" element = {<Checkout/>} />
        <Route path = "/orders" element = {<Orders />}/>
        <Route path = "/tracking" element = {<Tracking />}/>
      </Routes>

    </>
  )
}

export default App
```
